Stony Plain and District

Mr. Roy Alton, Edson, was a holiday visitor in Stony.

Mrs. Klapper, who had been visiting with her daughter, Mrs. H. Heichen, Inga, has returned to her home at Westlock.

The Ladies' Aid of the St. Matthew church held their regular monthly meeting on Thursday evening, at the home of Mrs. Jac Hennig.

Bill Comisarow returned to his business duties Tuesday morning from a ten-day vacation spent at the Jasper golf course. His trophies are now at the engravers.

Gravelling to the Beach

Jac Barrie's two mile road is to the fore again. Last week a delegation representing the Rotary club, Edmonton Beach cottagers and the Beach councillors waited on the Minister of Public Works, with a view to completing an arrangement with the Government in respect to the gravelling from the main Jasper highway to the Beach. The delegation was informed that the Government had a set policy on such matters; and that to deviate from this policy in any one instance would not be fair to the other parts of the province similarly situated. The members of the delegation are now considering ways and means of raising the requisite 50 per cent of the cost of the gravelling.

The Journal Asks This One.

What has happened to the small town agricultural fair? One or two day fairs are still being held in numerous communities; there are still local hot dog stands feeding the multitude by means of the heated and worried efforts of hard working committees; still a few hours spent at home washing and combing the old red cow and the fool little calf who frolics off to the manure pile as soon as her hair is nicely parted; still frenzied attempts to get the stock, the family and Lizzie all primed and all in time at the fair grounds; still horse shoes, and ports, and dairy exhibits melting in the sun, and directors running about with all the cares of the world registered on their faces.

Peony Planting Day, Oct. 1.

Tulip days, Rose days, make us think of those glorious displays in some of the Pacific coast. In Alberta over 600 organisations are asked to support the suggestion that Oct. 1st be the day on which people plant peony roots. The peony is our hardest perennial and a very attractive flower. U.F.W.A. locals, Women's Institutes and horticultural societies are requested to place orders early for peony roots. It is hoped to interest school children on their return to school, so that peony roots be planted at each of the schools.

Getting Back To Nature

Summer vacation days are practically over and boys and girls, youths and maidens are getting back to their school books and studies while father returns to his office or store and mother to her varied household activities. If these vacation days have been sanely and sensibly spent the result is that those who have enjoyed them go back to their studies or work refreshed in mind and body, physically strengthened, more alert mentally, and in every way better fitted for the duties that lie ahead, with stored up energy from the life-giving rays of the sun to carry them through the shorter winter days.

A well spent vacation, however, means more than this, especially for the young. There is no period, no one month or day throughout life when our education is complete, when we are not learning something, absorbing some new and possibly lasting impressions, storing up additional information, gaining in knowledge. Because for a few weeks or months we abandon the school room and text books for a camp in the woods, or a motor trip, or a sojourn in the mountains or by the sea, does not imply that during such time our education comes to a full stop. Quite the reverse is true.

Indeed, living for a few weeks in a summer cottage, by one of our lovely western prairie lakes, boating, bathing, fishing, rambling through the woods by day, watching the glorious sunsets and beautiful dawns, lazily contemplating the star-bespinked sky at night, living the simple life, both in food and dress, one is inclined seriously to question whether in this intense, highly organized, mechanical age, we are not beginning to lose some of the best things in life, and to substitute the artificial for the natural.

For example, are not those responsible for our educational system, the training of our boys and girls for their life work, not missing something very vital and important in their programme of studies? Nowadays we take a boy or girl at the age of six or seven and introduce him and her to the great realm of books. Thus early in life we open up a new world to them, and from that time onward the tendency is for them to turn only to books, or to their teachers using text books, as the source of all information. Boys and girls may thus become great students of books, but they lose the greater pleasures, the romance, the fine inspiration which comes from the study and observation of nature itself and the wonderful works of nature.

The writer confesses that he always liked the ideas and ideals and programme back of the Boy Scouts and Girl Guides movements, the training of youth in the art of close observation, of learning by doing. We like the idea of our Canadian boys and girls obtaining a knowledge of our flowers and trees, our birds and beetles and flies, yes, even our weeds, from nature itself rather than from books; we like them to recognize the evening star, and the dipper, and the north star in the great space of the sky overhead rather than in a diagram in a text book; we prefer they should know how to build a trustworthy footbridge over a stream they may have to cross rather than be forced to go miles out of their way to find a concrete or steel structure; we like to see them capable of starting a camp fire in a few minutes, cooking their own food, setting up a tent, making a bed with boughs, leaves and a blanket or two; we admire a boy using an axe expertly.

Book knowledge should come; it must come; it is absolutely essential. But are we not making the mistake of relying almost wholly on books in our task of education and neglecting the great outdoors and the wonderful works which nature alone presents to us? Is not the early education of our Canadian boys and girls too academic in character, and not quite practical enough?

Nature study in all its many branches is much more interesting to the average boy and girl in the earlier years than is book study, and the lessons they learn from nature will remain with them when much book learning is forgotten. Furthermore, the traits and characteristics developed through close contact with, and study of nature's own methods, are traits and characteristics which create habits of observation and initiative that will be found invaluable in life, irrespective of the profession or business in which one may ultimately engage, and they are real assets which are not so easily found within the covers of books.

Canada is a land of beauty and variety. Nature has been bountiful in her gifts to the Canadian people. It behooves us, therefore, to give our boys and girls every opportunity to observe, study and appreciate these beauties, to live and learn among and from them. Vacation days are happy days, but they are also, in the writer's humble opinion, among the most valuable of all our days of learning. There should be a way found to fit them more closely into our educational system.

Egg Laying Record

The Oyster Holds Undisputed Claim To This Honor

The world's egg-laying record, 25,000 in one second, 115,000,000 in 70 minutes, 600,000,000 in a year—all by a female oyster—is claimed by the oyster.

The feat was reported to a gathering of biologists, of international repute, civic, state and federal health authorities and shellfish commissioners from several states at the convention of the National Association of Shellfish Commissioners and the Oyster Growers and Dealers Association of North America, Inc.

Menace To Motoring Public

Outworn Car Is Becoming Peril On Modern Highway

The "One Horse Shay" made famous by Oliver Wendell Holmes, ran its course and then suddenly disappeared into atomic dust. Old cars are not as successfully disposed of, and unless some used-car dealer wins the gratitude of the motoring public by committing them to the junk pile they continue to obstruct traffic on the highway until they collapse in a heap of scrap at the roadside.

There is nothing romantic, uncanny or even interesting about the final chapter of the outworn car. Too often there is tragedy in the concluding lives.

The old, out-of-date, decrepit gas wagon is more than a problem—it's a peril.
It now costs \$25 in Old London to impede traffic by trying to operate an old car that should be on the junk heap. Public opinion will eventually ban such vehicles from our busiest highways, for they are certainly a menace not only to the owners, but to the motoring public as well.

Chain Letters

New Flood Of Chain Letters Cause Trouble To Postal Authorities

London postal authorities are again fighting a new flood of chain letters. The latest of them begins with the names of Charles Lindbergh, Colonel Davis, Bernard Shaw, John Barrymore, Dorothy Dix and Ramsay MacDonald. By the letter, one is given to understand that all these celebrated people have written nine letters to nine other people. A subtle threat of sudden death to anyone who fails to carry on the chain is hidden in the wording.

Bright Eyes, Rosy Cheeks

The Birthright Of Every Girl

Dull eyes mean misery and weakness—a sure sign of a bloodless condition. Asma's girls and women have dull, heavy eyes with dark lines underneath. The bright eyed girl or woman is always happy and well.

There is one way to make the eyes bright—to bring the glow of health to pale cheeks—that is to invigorate the body with blood—rich, red, health-giving blood. Dr. Williams' Pink Pills do this. Asma's girls and women. Mrs. Robert Devitt, Brougham, Ont., says: "My daughter became so ill and nervous we were to take her out of school. She was pale and thin; her eyes were dull and the doctor said she was anemic. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Makes Air Record

Pilot In Northern Alberta Flew 1,500 Miles In One Day, Making Five Stops

The latest of many air records in Northern Alberta was recorded the other day when Captain W. N. Sherlock, of Commercial Airways, flew 1,500 miles one day, making five stops en route for the delivery of letters and packages. The trip was made from Fort McMurray to Aklavik, with stops at Fort Resolution, Fort Simpson, Fort Norman, Fort McPherson and Arctic Red River. Captain Sherlock holds from Cumberland, England, and is a former member of the R.A.F.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and efficiently, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

British Columbia Minerals

A report of Hon. W. A. Mackenzie, Minister of Mines in British Columbia, shows an increased quantity production in the aggregate of minerals and metals, though the dollar gross value dropped from \$34,122,727 in the first half of 1925 to \$29,090,482 for the half year of 1926.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Trust on the genuine at your nearby drugist.

Money For Farmers

Approximately \$1,000,000 is being distributed among farmers of Saskatchewan who were shareholders in the Saskatchewan Co-operative Elevator Company, Limited.

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—
"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. Dr. Fowler's made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

British Rule In India

What England Has Done and Can Do For People Of That Country

"Downeaster" writes as follows in the Canadian Churchman: The achievements of England in India during the last century, I think I may safely say, constitute one of the brightest pages in the history of our race and Empire. Like all human records, it is not of course without its blot. But I think it has on the whole fully justified Macaulay's closing words in his celebrated essay on the character and work of Lord Clive. "If in India the yoke of foreign masters, elsewhere the heaviest of all yokes, has been found lighter than that of any native dynasty, if that gang of public robbers that once spread terror through the whole plain of Bengal has been succeeded by a body of functionaries not more highly distinguished by ability and diligence than by integrity, disinterestedness and public spirit, if we see men like Munro, Elphinstone and Metcalfe, after leading victorious armies and deposing kings, return proud of their honorable poverty, the praise is in no small measure due to Clive." But to me, and I believe to the great majority of Britons throughout the Empire, England's noblest achievements in this connection will be the gradual fitting of the inhabitants of the Indian peninsula for self-government and should the event demand it, ultimate independence.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Expeller, an excellent remedy.

"Did your husband follow my directions? Did he take the medicine I left for him religiously?"
"I'm afraid he didn't, doctor. In fact, he swore every time I gave him a dose."

Minard's Liniment For Asthma

London's City Remembrancer has to investigate all prospective legislation and call to the attention of a special committee all legislation affecting the City of London.

No Reciprocity

British War Veterans Will Have To Pay \$10 Visa Fee

Eighteen British war veterans, coming to the United States for a convention next month, will be required to pay the usual \$10 visa fee each, despite Great Britain's courtesy a few years ago in admitting several hundred American Legionnaires without charge.

Sir Ronald Lindsay, British ambassador, was informed in a note made public recently that the State Department regretted its inability to comply with his request for a blanket visa, but that the law gave it no alternative. A formal reciprocal agreement would be necessary, the State Department informed Sir Ronald.

In a town in Turkey, it is the custom of fathers to plant a tree at the birth of each daughter in the family, and cut it down when she is grown to provide funds for her hope chest.

Periodic Health Examinations In The Future To Guard Against Unnecessary Illness

(By John Burke Ingram)

Should doctors be paid for healing their patients? This is the foolish question a friend of mine replied: "Certainly! That's what doctors are for."

Is it? Do you remember the old, old fable about the way the Chinese pay their physicians? Only when the patient is well is the doctor paid. Thus the interests of patient and doctor are identical. Smart people, those Chinese! Today we say, "Try to work out some system in the name of 'Preventive Medicine.'"

To-day the attitude of the doctor towards disease is changing. Vaccination against smallpox started that change. Before vaccination, doctors existed solely to cure. With the coming of vaccination they began to prevent illness.

Vaccination has been followed by similar discoveries. It is now possible to "vaccinate" (the word while inexact medically, is correct in general sense) against diphtheria, typhoid fever, scarlet fever, rabies, infantile paralysis and other diseases. Almost every year sees another or two additions to the list of preventable diseases. And year by year the falling death-rate from tuberculosis proves that preventive medicine is effective in combating many of those ills of the flesh against which no specific has yet been discovered.

The most significant recognition that has been given to the principle of preventive medicine has been the organization of public health departments. The function of every public health official is not to cure disease, but to keep the public healthy. And more and more this is becoming the function of the practising physician, too.

What is to happen to the average doctor when—and if—we reach the Aesculapian utopia in which there are no sick people left to heal? This state, thinks Dr. Gordon Ewing, the writer on the condition in the current issue of the Canadian Public Health Journal, will be a most happy one. For instead of having thousands of sick to heal, he will have millions of well folk to keep well. Truly a more congenial, as well as a more profitable state of affairs to both doctor and patient.

Half of all the illness in Canada is preventable, he says, and over 30 per cent. of our deaths are preventable. The direct cost of illness he places—from conservative estimates made by public health officials from coast to coast—at \$300,000,000.

He visualizes a day when a mother, instead of philosophically hoping that her offspring will have their share of children's diseases early and get them over with, will consult her family physician and arrange with him to have the children immunized against these diseases so that they won't have them at all. A much less expensive, less annoying, less dangerous procedure. He points out that though Canada has annually about 1,200 deaths from diphtheria, and 13,500 cases of it, preventive medicine could cut the toll of this disease by 95%—and that it fails to do so largely through ignorance or neglect of parents, since diphtheria is principally a disease of childhood.

"But what other phases are there to the adoption of preventive medicine by the general practitioner?"

"Is this place healthy?"
"Rather! I couldn't walk when I came here."
"Did you have rheumatism?"
"No, I was born here."—Buen Humor, Madrid.

Dr. Bates asks, "One thinks immediately of the periodic health examination idea."

"Many illnesses which have resulted in death might have been prevented had the physician had the opportunity of acting in the incipient stage of the disease in question. An infected tooth or tonsil may spell disease or death; cancer, syphilis, tuberculosis may result in death because of neglect when the symptoms are slight; and these are only examples of conditions in which at present the physician too frequently has not the opportunity of exercising a preventive function. Over-eating, over-drinking, overwork, over-exercise, worry may present problems just as serious but the culprit seldom consults his medical adviser until Nemesis is upon him. The effect on sickness and death rates is obvious."

A year ago through the co-operation of the Canadian Medical Association and the Dominion Department of Health a standard form, designed for the use of the physician in the examination of the apparently well, was forwarded to every physician in Canada.

"The case for periodic health examination is, so strong that unquestionably this procedure will form a most important part of the armamentarium of the general practitioner of the future to the end that unnecessary illness may be prevented."

"Important steps in the direction of making the application of periodic health examination practical have already been taken. A number of the Canadian life insurance companies have entered into a co-operative scheme with the Canadian Medical Association whereby certain policyholders will have made available for them free medical examination by their own family doctors, or at least by doctors of their own choice, the life insurance companies paying the bill."

So the life insurance companies find periodic health examination good business, as a life-prolonger for heavy policyholders, that they are willing to pay for it!

Which makes it look as though it was a good thing for one to walk around with his family physician and say: "Doctor, look me over now and on every birthday from now on. Practice preventive medicine on me. Keep at my insides with x-rays. Ask me leading questions about, my way of living. I don't want to get sick, and I'll pay you handsomely to keep me well!" Clever people, those Chinese!

Value Of Agricultural Fairs

Postmaster-General Believes They Teach Profitable Lessons

The Minister of Agriculture, Hon. Robert Weir, intends to assume a policy that will render justice to all parts of the country in aiding farmers. Hon. Arthur Sauve, Postmaster-General, said in an address given at the Three Rivers exhibition. Mr. Sauve discussed the value of agricultural fairs which taught sane and profitable lessons showing the possibilities of agriculture, which, he said, was the basis of national prosperity. Reviewing the situation facing the new administration Mr. Sauve said: "Our problems are many, and it is important that national education should be carried on in such a manner as to assure that all portions of the population contribute to their solution."

"We are experiencing an alarming crisis, which everybody will admit. Everyone must help. The governing bodies must play their part properly."

Montreal Unemployed

Montreal at present has between 21,000 and 23,000 unemployed, with another 10,000 to 15,000 working but two or three days a week, according to reports from Labor unions reaching the city hall. It was announced by Ald. Alfred Mathieu, member of the executive committee. The information will be passed on to Hon. Gideon Robertson, Minister of Labor, who is compiling data on unemployment throughout the country.

(By Annabelle Worthington).

2546

Soft moulded lines are featured in a printed chiffon of cool green colouring.

It emphasizes the normal waistline through horizontal inverted pla ticks at either side of the bodice.

The bow of plain crepe placed at the left hip echoes the femininity of the mode.

The low draped circular flounce of the skirt terminates in a slender wrapped arrangement at the front.

The caplets falling softly over the arms give impression of sleeves.

Style No. 2546 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Hyacinth blue crepe silk, daffodil yellow sheer linen with soft cocoon brown fallie crepe bow, coral red chiffon, printed dimity in dusty pink tones and peach pink washable flat crepe are essentially smart combinations for summer wardrobe.

Honor Heroic Conductor

Tribute was paid recently by Colonel the Honorable Murray MacLaren, Minister of Pensions and National Health, and Colonel C. A. Hodgetts, Director-General of the St. John's Ambulance Association, to the heroic action of Clarence W. Leach, passenger conductor on the Canadian Pacific Railway between Ottawa and Montreal who, by his prompt action and presence of mind rescued Claire McDougall from drowning in the Rideau Canal last June. Mr. Leach is shown standing third from the left and alongside him are the Minister, Colonel Hodgetts and J. H. Hughes, C.P.R. superintendent of Ottawa. Presentation of the Honorary Testimonial of the Royal Canadian Humane Society was made in the Minister's office. Mr. Leach is inset.

Growing Respect and Good Will That Mark Relations Between Canada and the United States

Beef Grading Policy

Attracting Attention On The British Market, Report Shows

The beef grading policy of the Dominion livestock branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true qualities of beef, but is also attracting attention in the British markets, reports show.

The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals."

Cattle For Old Country

Shipment Made During August Was Just For Experiment

On August 21st, for the first time in over three years, a shipment of Canadian cattle left Canada for the United Kingdom. This shipment of forty head is an experiment that will be watched with interest by western, as by eastern, cattle raisers and shippers. Now that the United States border has been closed to our animals, it becomes all the more desirable to revive the lapsed business with the Mother Country. It is prophesied that, if shipping facilities can be arranged, sixty thousand head can be sent across the Atlantic this year. This is not the first time that the American Republic, by sudden fiscal departures, has forced us to look to the British family circle as an outlet for our farm products.

Clover Seed Prospects

Production Of Alsike Clover Better In Quality Than Last Year

The Seed Branch of the Dominion Department of Agriculture estimates that the production of alsike clover seed for 1930 will be better in quality both with respect to colour and purity than last year's crop. Ontario production is not expected to exceed one-third of the 1929 crop, when 70,000 bushels were harvested. The alsike seed market is not overly promising at the present time. Better prospects are reported for red clover seed with practically no carry-over from last year and 1930 acreage about 50 per cent. below normal. An increased acreage of alfalfa being saved for seed is reported.

Manitoba Egg-Laying Contest

White Leghorns led the Manitoba egg-laying contest at the Brandon Experimental Farm at the end of the 57th week. These birds, owned by J. R. Beer, of Brandon, had a total production record of 1,636.2 points and 1,634 eggs. Barred rocks owned by F. E. Foster, of Lena, Man., led for weekly production with 51.2 points and 48 eggs.

The protracted discussions over naval strength on the part of Great Britain, France, Italy, Japan and this country only serve to emphasize the growing respect and good will that mark the relations between Canada and the United States. Nor does this statement imply any lack of friendly relations in the past. But the growing state which each country has in the other cannot fail to bring them still closer together. Above all, we feel that the people of this country are coming to have a more and more wholesome respect for Canada as it emerges from its pioneering conditions into a great industrial nation. It is not merely her wealth of natural resources which we admire, as anyone must, but the way in which her capable, industrious and enterprising people are developing them.

During the war, Mr. McAdoo, then Secretary of the Treasury, remarked to a high Canadian official that, in his opinion, Canada was the most productive country in the world per capita. Certainly her heritage is rich and vast. It is true that in ten years the United States has invested some \$3,500,000,000 in Canada. But Canada has penetrated the United States as well. One of her life-insurance companies is the largest stockholder in at least two of our great corporations and more than \$1,000,000,000 of the life insurance in force here is held by Canadian companies. Canada is the largest taker of our exports, ranking ahead of any of the Great European powers, with a total value of nearly \$900,000,000, while we, in turn, buy more than \$500,000,000 worth of goods from her.

After the war Canada suffered a depression much as we did, and went through several bad-crop years. These were followed by four or five years of big crops and an impressive development in mining, hydro-electric power and industry generally. Although Canada has only one-twelfth the population of the United States, she is indeed a powerful neighbor, and one whose bargaining ability is extremely great—far out of proportion to her population. One need mention only her control of the raw materials for paper making. Then, too, the Canadians seem to have very real genius in building up financial organizations; their banks and insurance companies attest to that.

Canada's population is sure to increase. Indeed we are adding to it constantly. There is migration both ways, an interchanging of population on a great scale that can only make for mutual respect and good will. In the case of Canada and the United States, these seem to be mutual conquest or penetration of one by the other. In this instance, business victories carry peace instead of war or fears of war. Few countries have such opportune associations, and yet one cannot but feel that the extension of these relations into other international fields is to some extent possible.—Saturday Evening Post.

In Business For 70 Years

The old village of Bath, near Kingston, Ont., where United Empire Loyalists settled more than 140 years ago, has a resident, Robert Mott, aged 51, who is still active, and has been 70 years in business. He is still conducting a general store, assisted by his wife and son. From 1860 until 1890 he was in the harness-making business. Some of his forebears reached great age, his grandmother being 101 and his grandfather 90.

"Thank you for the balloon, uncle."
"Oh, it was a very small gift."
"That is what I said, but mother said I must thank you all the same."
—Buen Humor, Madrid.

TARIFF ACTION TO PROTECT THE FRUIT GROWERS

Ottawa, Ont. — The dumping of fruits and vegetables from the United States into the markets of Canada, which has been the cause of strenuous protest for some time past, has resulted in definite action by the government. Hon. E. Ryckman, Minister of National Revenue, has announced the fixing of values for duty purposes on ten fruits and vegetables which are among the common food commodities on the Canadian table. The fixing of value for duty purposes means that such fruits and vegetables entering Canada must pay a duty on the basis of the valuation determined by the minister.

Provisions of the Customs Act permit the government to fix valuation on commodities entering Canada "if they consider such action desirable." In the past, on the floor of the House of Commons, as well as outside parliament, the claim had been made by representatives of the Canadian fruit and vegetable growers that the "cream of the Canadian market" went to United States producers because they were in a position to bring forward their product earlier than it would be produced in Canada. There was also the claim that when the United States market was satisfied, fruit, which would otherwise have glutted that market, was dumped into Canada at a much lower price than prevailed either in United States or Canada. This, it was claimed, constituted unfair competition which the Canadian producer could not be expected to meet.

Imports of fruits and vegetables from United States have grown to considerable proportions of late years. The Canadian market has proven attractive to the producers in United States who could get their product into Canada before the home-grown fruits and vegetables were available.

The effect of the action will be to ensure that the United States fruits and vegetables covered by duty are what is considered a fair valuation.

Comparison of the values fixed on fruits and vegetables with those prevailing heretofore is practically impossible because of variations which have existed in different parts of Canada. Apples, for instance, might enter Canada at a lower value for duty purposes in the maritime provinces than in the prairie provinces. That depends on the invoiced value of shipment.

The agitation for application of the dumping duties on fruits and vegetables naturally emanated from those sections of Canada where these commodities are largely produced.

The fruits and vegetables upon which a valuation has been fixed, together with their values for duty purposes when entering Canada from United States are as follows:

Apples, six cents per pound; cantaloupes, five cents per pound; cantaloupes, thirteen cents per pound; celery, ten cents per pound; onions, four cents per pound; peaches, twelve cents per pound; pears, nine cents per pound; plums and prunes, eight cents per pound; tomatoes, ten cents per pound.

Noted Actor Dead

Lon Chaney Succumbs To Pneumonia After Gallant Fight For Life

Los Angeles—Lon Chaney, noted character actor of motion pictures, died here, August 28.

Lobar pneumonia, against which the veteran actor had fought a valiant battle for more than a week, caused his death. He was considered on the way to recovery, but a hemorrhage proved fatal.

Chaney was 47 years old. Born on April 1, 1883, in Colorado Springs, Colo., the son of deaf and dumb parents, Chaney quit school before he had reached the fifth grade to become a tourista's guide on Pike's Peak.

His introduction to the theatre was as a property boy. Later he became a stage hand, and to his death he carried a card in a stage hand's organization. He got his first "break" as a song and dance man at a stage hands' benefit when he was 16 years old.

Has Faith In Canada

Premier Brownlee Is Optimistic Over Future Of Dominion

Simcoe, Ont.—Speaking before the Simcoe Rotary Club, Hon. John E. Brownlee, premier of Alberta, and distinguished son of Norfolk, commented on the subject of immigration and unemployment in the province of Alberta.

Referring to the continued influx of immigrants to the West, he said: "They have been coming into the Peace River country at a great rate in the last couple of years. You cannot continue to pour people into any country like that without experiencing a set back. The country again cannot assimilate them and it becomes a serious problem when an era of low prices and falling markets sets in. Many easterners have been unable to understand why Alberta wanted the bans up against immigration. The present situation affords the answer."

At the same time Premier Brownlee took occasion to refute newspaper reports of Red activities in Alberta. "You will find more Reds in the city of Toronto or the city of Hamilton in one day," he declared, "than you would find in our province in a year."

He defended the policy of the western wheat pool in connection with marketing the wheat crop, asserting that the pool had always been exporting its just share. "It is just one of those cycles," he believed, "when there is an over production in the basic commodities of life and the country suffers a temporary depression."

Premier Brownlee declared himself to be an optimist about the future. "It may be one month, two months, a year, or maybe more before conditions right themselves, but of the future of this country we can have no doubt."

Completes Trans-Atlantic Hop

Capt. Von Gronau Lands In New York Harbor After Northern Flight From Germany

New York.—Achieving an ambition of long standing, Capt. Wolfgang Von Gronau landed in the harbor here, completing an eight-day flight from Germany during which he and his three companions flew over the key wastes of Iceland and Greenland. "I can hardly believe it is true," he said. "All my life as a pilot I have dreamed of sometime landing in this wonderful harbor. We had rather a struggle with storm and rain and fog over the vast icy areas but we came through all right."

Capt. Von Gronau said he did not announce he was planning a flight across the Atlantic when he took off from the Isle of Sylt, in the North Sea, because he was not sure himself just how far he was going to be able to go.

"I thought it was best," he said, "just to start out and see how it went for a while."

The German crew followed a long northerly course, by way of the Faroes, Iceland, Greenland, Labrador and Nova Scotia, leaving Halifax this morning for New York. The route was about 4,000 nautical miles and the flying time was 47 hours.

Capt. Von Gronau, standing on the seawall, looked out at his old ship riding easily on the swells and smiled with pride.

"Not many years from now," he predicted, "a plane from Europe will be landing in this harbor every day."

Air Mail From Iceland

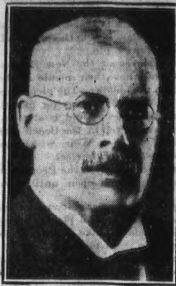

First Delivery Made To Halifax By German Flyers

Halifax, N.S.—The first air mail from Iceland and Greenland to Canada arrived here August 28, in the custody of Captain Wolfgang Von Gronau and his companions aboard the flying boat D-1422, which flew to Halifax from Greensport, N.S., after a flight from Germany to Iceland, Greenland and Labrador. Captain Gronau delivered the mail to D. A. King, postmaster here.

Plans Bulk Shipping

London, England.—A plan whereby Great Britain would purchase in bulk primary products from the dominions and providing for the exclusion of competing commodities from other countries is being prepared by Rt. Hon. J. H. Thomas, secretary of Dominion Affairs, for submission at the forthcoming Imperial Conference, according to the Financial Times.

NEW CABINET MINISTER

Dr. Murray MacLaren, new minister of pensions and national health in the Bennett cabinet, who is a native of New Brunswick, with a very distinguished career.

A Great Discovery

British Delegate To Medical Convention Stresses Value Of Insulin

Winnipeg, Man.—Insulin, discovery of a Canadian research expert, is one of the greatest advances in medical science, according to Sir William Taylor, K.B.E., C.B., of Dublin, Ireland, who is here attending the British Medical Association convention. Diabetes mellitus, which had always proved fatal, particularly in early life, could now be controlled. Insulin had altered the whole treatment of the disease. "With the aid of insulin, I have been able to perform operations which I could not have dreamed of without it," declared Sir William.

Referring to birth control, Sir William expressed himself in favor of it insofar as it tended to raise health standard. "It is a good deal better to exercise control than to allow a superabundance of children to be brought into the world who cannot be properly educated, or properly fed," he commented.

Device Proved Successful

Detroit, Mich.—A parachute device to bring aeroplanes safely to the ground in emergency cases, operated successfully in a test conducted here. The apparatus, carried in a tube beneath the fuselage, lowered a plane from a height of 2,000 feet over Grosse Ile airport.

Government Steamer Nearing Winter Harbor

"Boothie" Battling Ice and Fog In Arctic Sea

Ottawa, Ont.—After a continuous battle with ice and fog, the Canadian Government Arctic patrol steamer "Boothie" is approaching winter harbor on Melville Island, it was announced by officials of the North West Territories branch of the Department of the Interior.

The ship is carrying the 1930 Arctic expedition which will spend some time among the Canadian Archipelago. Its immediate purpose is to re-provision the cache on Melville Island established there in 1908 by Capt. J. E. Bernier, of the C.G.S. Arctic and which has played a most important part in the exploration and the policing of Canada's northern empire.

Still Holding By-Elections

No Immediate Possibility Of Law Being Amended

Ottawa, Ont.—Political observers here see no immediate possibility of amending the elections law to obviate the necessity of cabinet ministers going before their electors at by-elections when they assume office.

Two or three years ago a resolution was read in the House of Commons recommending that by-elections for cabinet ministers be dispensed with. The government of the day promised to give consideration to it and no vote was taken. Ontario is one province that has eliminated by-elections for its ministers.

Climbers Conquer Mount Robson

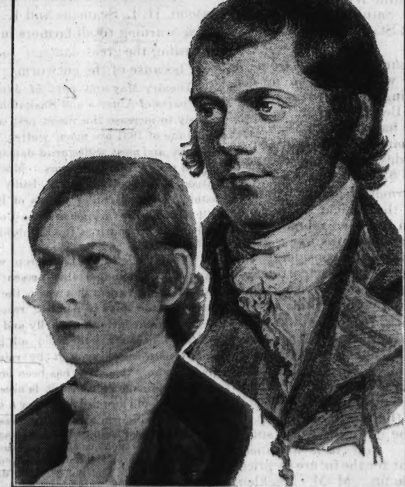

Members Of Mount Everest Expedition Reach Summit

Mount Robson, B.C.—Mount Robson, after many attempts has been climbed for the first time this season. A party, composed of N. E. Odell and C. G. Crawford, of London, England, both members of the Mount Everest expedition, and T. T. T. Moore, of Haddonfield, N.Y., successfully gained the summit.

It was in a lone attempt to climb Mount Robson, 12,972 feet high, the highest peak in the Canadian Rockies, that Newman, D. Waff, of Orange, N.J., lost his life recently.

Old U.S. touring cars are being used as taxis in Cairo, Egypt.

Burns' Descendant Sings Poet's Ballads

Enid Gray, a brilliant young soprano of Toronto, who will be at the Highland Gathering at Banff, and who will sing the ballad opera "The Ayrshire Ploughman," incorporating songs of Robert Burns, has the additional distinction of belonging to the Burns' family, being a great-great-granddaughter of James Burns, first cousin to Robert Burns.

James Burns went to Ireland to be bailiff on the estate of Sir Robert Gore. Here he married Mary Young, and they had nine daughters, of whom Jane Burns was one. Jane came to Canada, where she married, and her youngest daughter Mary was the grandmother of Enid Gray.

It is interesting to note the strong physical resemblance as evidenced by comparison of photographs of Miss Gray and Robert Burns.

INITIAL PAYMENT OF POOL IS SET AT SIXTY CENTS

Winnipeg, Man.—Days of anxious waiting are over and now the 154,000 western farmers, members of the prairie wheat pools, know what the initial payment is to be on the 1930 crop.

It will be the lowest in the seven-year history of the pools: 60 cents a bushel on wheat; oats, No. 2 C.W., 30 cents; barley, No. 3 C.W., 25 cents; rye, No. 2 C.W., 35 cents; and flax, No. 1 N.W., \$1.25. The 60-cent payment on wheat will be made on the basis of No. 1 Northern Grade at Port William.

Along with the official announcement from A. J. McPhail, chairman of the Canadian Co-operative Wheat Producers Limited, the central selling agency of the pools, and from Premier John Bracken, of Manitoba, came a plea to the creditors of the western agriculturists to be lenient. The same plea was made in Regina, at a conference of wheat growers, business men, and members of the Saskatchewan Government, under the leadership of Premier J. T. M. Anderson.

Both Mr. McPhail and Mr. Bracken drew attention to the serious situation facing the prairie farmers, who, for the second year in succession, in face of depressed world grain values, are now harvesting a crop below the average in yield.

"The government of Manitoba," said Premier Bracken, "believes that in the present emergency industrial and financial interests should refrain from unduly pressing collections from farmer debtors. It is in the interests of all Canada that our farmers should not be embarrassed by too energetic attempts by competing creditors to collect larger payments than farmers are able to pay." Sale of the prairie crops "under pressure" would depress values, with serious consequences to the agricultural and business interests of the Dominion, he said.

Mr. McPhail declared: "As the welfare of our prairie provinces is almost entirely dependent on the solvency of our agricultural industry, we hope and feel confident that all interests concerned in the welfare of western Canada will co-operate in minimizing the difficulties our farmers are facing at the present time."

The chairman of the central selling agency stated that a further payment which would involve an increase in the initial payment will be made as early as a date as market and financial conditions will permit.

Since the formation of the wheat pools in the west, with the exception of one year, the initial payment has always been \$1 a bushel. In 1925 values were depressed, the initial payment was 85 cents a bushel.

Proposed Changes In Homesteading Policies

Will Be Presented To Commission By Saskatchewan Government

Saskatoon, Sask.—Findings of the Royal Saskatchewan Commission on Immigration and Settlement which will be presented to the government will, if acted upon, involve radical changes in the homesteading policies of the past. Dr. W. W. Swenson, chairman of the commission, announced.

One of the most interesting and important researches of the commission, he stated, dealt with vacant lands. Since the return of the natural resources to the provinces, it became imperative to devise a program based upon sound policy for the development of these lands and this the commission had attempted to do.

Dr. Swenson would not indicate the nature of the suggestions. Researches were made by the commission into the present condition of agriculture and its future possibilities with a view to relating these to immigration and settlement. Many other problems, rural and urban, had been studied so that the entire report comprises a comprehensive and detailed analysis of the best problems of immigration, colonization and employment.

Duffield Doings.

The new Anglican chapel is nearing completion, and the opening services will be held when the Rector returns from his vacation.

Mr Anderson, the painter, has been doing several jobs hereabouts lately, notably the Duffield hotel, the Pigeon residence, and the Landsman house.

It is reported that tenders will shortly be called for carrying the mail on the Keep Hills route.

Several carloads of local dancers attended the informal dance given at Rexboro school house Friday evening by Martin's orchestra.

There is much curiosity hereabouts as to the location of the new department store. The Location Supt. of the chain store syndicate is expected to arrive this week, to pick out a site.

Wheat Pool's Initial Payment

The 143,000 members of the prairie wheat pools know, this week, what the initial payment is to be on their 1930 crop. It will be the lowest in the seven-year history of the Pools—60¢ a bu., on the basis of No. 1 Northern at Fort William.

Since the formation of the wheat pools in the west, with the exception of one year, the initial payment has always been \$1 a bu. In 1923, the record crop year when grain values were depressed, the initial payment was 85¢ a bu.

Stony Plain and District

Mr and Mrs A E Michael and family paid a week-end visit with Mr and Mrs Opgordon, at Halkirk.

Mr Geo. J. Bryan returned Tuesday, from a motor trip to the Montana border, which included visits in Calgary, Macleod, and Waterton Lakes district.

Mr and Mrs S M Wainberg motored up from Bashaw, on a visit to Mr and Mrs Comisarow, on the holiday.

Mr Melvin Witmer left this week for Plymouth, Wis., to resume his studies at the theological seminary.

Mrs Hyett, who received an injury Aug. 26th, had recovered sufficiently by Friday to be taken home from the Edmonton hospital.

On Thurs. Aug. 28, to the wife of Mr John Reiser, a daughter.

On Thurs. Aug. 28, to the wife of Dr R A Walton, a daughter.

The local school board held a meeting Friday evening, sitting as a court of revision. Appeals from assessments on their properties were made by John Armbruster, V Pailer Sr., J F Baner.

Beaumont's Home Bakery has moved to new quarters, in the Horn building, on First St. East.

The Baby Clinic, held in the town hall Tuesday afternoon under the auspices of the Women's Institute was well patronized, about 18 babies putting in an appearance. Miss Emerson R N. was in charge; she was accompanied by Miss Jones.

The A. P. Police Detachment was moved, this week, from Up the hill, to more commodious premises on Gopher Boulevard.

Meridian Lodge held its regular monthly session Tuesday evening, in Masouic hall, with L. Kowensky, W. M., presiding. Several members were advanced to the Third Degree. Caterer Larson provided the lunch.

Baillif Wudel is holding a sale Saturday afternoon, on First St. of a McLagan Victoria.

Four young men from the City who had been misconducting themselves at Edmonton Beach Sunday morning were haled before Magistrate Williams in Stony Plain on Tuesday afternoon and each fined \$10 and costs.

Farmer readers will note that the article on the cutworm has been reproduced in our columns this week, as the Department considers this matter of great importance to the grain raisers who count on a big crop in 1931.

With regard to the offer to juveniles to collect scrap lead, Mecklenburg says: "The market on lead and other metals is away down; therefore it does not pay to ship it to the smelters. Save it, if time it will be worth some thing. Now it is worthless. Save it for the future as prices will be up. M. M. Mecklenburg.

Do not neglect your eyes. Get them now! Charges are reasonable, \$10.00 and upwards. The very latest, best frames and lenses only supplied. At Royal Hotel on Monday Sept. 8th, and every two weeks afterwards. M. M. Mecklenburg.

Edmonton Beach.

Mr. Barrie announces a free dance at the Beach for the farmers of the district for Sat. next Sept. 6. Everybody welcome.

Twenty-one lots have been sold at this popular Beach this year—all to Edmonton people.

The employees of the New Edmonton Brewery held their picnic at the Beach on the holiday. The picnickers enjoyed themselves playing games, swimming matches and boat races. Dinner was served in the Beach cafe by Miss Moore, who was pronounced 100 p.c. perfect.

It is the intention of the Proprietor to keep the Beach open until snow flies.

A large number of City motorists took advantage of the pleasant weather on Sunday to take a run out to the Beach in the afternoon.

A fire from some unknown cause consumed Mr. Barrie's refreshment booth at the baseball diamond about midnight Saturday. Loss \$150; no insurance.

A large crowd of gay dancers patronized the Midnight Frolic, Sunday. Stony and the City were well represented, and delegations were present from Millet and Leduc.

The Beach Postoffice closed on Monday, for the season.

A Grave Warning Is Issued to Farmers.

(By H G L. Strange)

The Dominion Entomologists of Lethbridge and Saskatoon, H. L. Seaman and K. M. King, have issued a very grave warning to all farmers in Alberta and Saskatchewan regarding the great damage to crops that may occur next year because of the cutworm.

The dry May and part of June that has been experienced in most parts of Alberta and Saskatchewan this year has tended enormously to increase this insect pest, and it is expected that unless May and June of 1931 are much wetter than is usually the case, that the greatest and most widespread damage that has ever been experienced will result from cutworms. Most of Saskatchewan, south of Saskatoon, it is expected, will be badly affected. With the worst damage within a hundred miles radius of Regina. In Alberta, the damage will probably be very general east of a line from Edmonton to Macleod and as far south as the Lethbridge-Medicine Hat line of the C. P. Railway.

The damage to the 1931 crop will depend absolutely upon the way fields are handled this present August and September. The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days in August, reaching its maximum flight about the 20th, and continuing to fly and lay eggs until about the middle of Sept. This moth will avoid all land that has had even a very slight crust formed upon it by rainfall, but will lay its eggs upon any soil where this crust has been broken, however slightly. To avoid cutworm damage on a field it is necessary on summerfallowed fields all work should stop by Aug. 1 or a very few days after. Then a very slight rain will form a crust on these fields, rendering them immune to the following year from cutworm damage. It is important that no stock, implements or wagons be allowed to cross summerfallowed land in this fashion, as wherever the crust is broken by animals or implements, there the moth lays eggs, and considerable damage will be seen the following year. On fields in crop, where harvesting operations are conducted before Sept. 1, then damage the following year is almost certain to be experienced unless these fields are summerfallowed.

It is apparent, therefore, that all fields which are cropped this year should be summerfallowed in 1931. In addition, all work on summerfallow this year should cease as soon after Aug. 1 as possible, and that nothing be allowed to cross these fields.

H. L. Seaman, Dominion Entomologist stationed at Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on summerfallow after Aug. 1 in these affected areas, rather than disturb the crust of the soil and so invite cutworm damage.

Spruce Grove News

Mr and Mrs H. L. Morrow motored up to Entwistle over the week end.

Reg. Pinchbeck, who has been on Government survey work this summer, is home at present, on a short vacation.

Mr MacKean, on Friday, sold the last of his shipment of binder twine.

Spruce Grove M. D. Councillors held an all day meeting Tuesday, with Reeve T. Wudel presiding.

Big Kat Roy is taking a correspondence course, in preparation for the Civil Service exam.

Part of the grain on the McLaughlin farm is being cut, this season, with the combine harvester, and the balance with the regular binders.

Tenders have been called by the Dept. of Public Works for the erection of a cable guard rail on Road 16 (the Baseline) from Edmonton to Scotch Beach. It will be a source of much satisfaction to motorists when they see the curves properly guarded.

Those local farmers who still hold shares in the U. G. G. are this week receiving their checks from the head office in Winnipeg as a dividend of 6 per cent. has been declared on their holdings. The local Pool elevator is one which was taken over from the U. G. G.

Asbestos production in Canada during 1929 set up a new high record, according to the finally revised figures of the Bureau of Statistics. Shipments in 1929 amounted to 304,000 tons, valued at \$13,727,881, an increase of 12.1% in quantity and 17.3% in value as compared with the previous year. The average value received by the operators was \$45.44 per ton, compared with \$41.16 the previous year.

Nipigon trout, known all over the continent as the gamut of game fish, are coming into the spotlight again according to reports from the famous Ontario resort where the annual contest for the largest speckled trout is now in full swing and will continue until September 14. The best entry to date is a 54-lb. fish, measuring 32 inches in length and 14 in girth taken with a single splinter whip on a 2 1/2-foot rod, by Edmund Stalter, of Paterson, N. J., July 29.

East and West, Orient and Occident, will meet in the British Empire Fishing competition, one of the most important of the new features to be introduced at this year's Highland Gathering and Scottish Music Festival to be held at Banff at the end of August. Pipe-Major John Clark and E. L. Collins of the Royal Scots Regiment of Scotland, of whom Pipe-Major Clark is in-chief, will come from the British Isles, while Pipe-Major W. C. MacKie of the Scottish Company of volunteers is on his way to Banff from Hong-Kong.

Prospects for increased earnings during the fall months are good and directors of the Canadian Pacific Railway have no intention of reducing the dividend, said E. W. Beatty, chairman and president of the company, recently in reply to rumors that the dividend might be cut.

Nowadays the world moves on rubber and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria in June bought 300 pairs of shoes with rubber soles from Canada. Barbados took 2,000 pairs and Trinidad 4,000 pairs. In June the export of Canadian automobile tires exceeded \$1,000,000 in value.

Canadian farmers are now producing all the fine tobacco required by Canadian manufacturers according to a statement just issued by the Dominion Department of Agriculture which claims that the tobacco is of better quality than that usually imported. Canadian tobacco has also become a factor in the British tobacco market.

An increase of 58% in motor tourist traffic from the United States to New Brunswick is shown in statistics for the 1930 season up to July 31 as compared with the same period last year, according to figures issued by the provincial government Bureau of Information and Tourist Travel from returns from Canadian Customs collectors at the 24 ports of entry along the International Boundary.

"It is not generally known that the Prairie Provinces—Manitoba, Saskatchewan and Alberta—contain important commercial fisheries. In 1929 the commercial value of fish caught in these provinces exceeded \$4,000,000.

Herman Trelle, of Wembley, Alberta, former wheat and oats king, won first prize at the Regina Exhibition for his Marquis and Reward wheats. William Darnborough of Laura, Sask., was second in the Marquis class, and E. Thomson of Pathow, Sask., came just behind Trelle in the Reward class.

IT'S WISE TO  CHOOSE A SIX

You can afford Six-Cylinder Luxury if you can afford any car!

Three Canada firsts—all worth seeing. Considerable view of rugged landscape. First the motorist traveling British Columbia's scenic Caribou Road through the foothills of the Rockies.

IN size, performance and appearance, the Chevrolet Six is superior to any other low-priced car on the road today. Because of this fact, many people believe that the Chevrolet is priced much higher than it really is.

Yet, with a base price of \$635 at the factory, Chevrolet is actually one of the easiest cars in the world to buy!

COSTS NO MORE TO OWN

And, while it is a six-cylinder, 50-horsepower, heavier car—the Chevrolet Six costs no more for gas . . . costs no more for oil . . . costs no more for upkeep!

So easy is Chevrolet to buy—and so economical to operate—that it alone can give you the full dividends of motoring pride and satisfaction which your money ought to earn when invested in the low-priced field.

GO FOR A CHEVROLET RIDE

Call us up today, and let us send a Chevrolet Six for you to drive, without obligation. Find out how much more enjoyable six-cylinder motoring is. Ask about the General Motors Owner Service Policy, the most complete in the industry—and about the G M C, General Motors' own deferred payment plan.

Prize Pelts Are Canadian.

The finest weasel furs trapped in North America during the 1929-30 trapping season were taken in Canada!

At any rate this was the verdict of five expert judges of raw fur who met at Columbus, Ohio, in May, to scan the cream of the crop and to name the best pelt of the year for the awarding of prizes given by the Animal Trap Co. of Niagara Falls, Ontario.

Three judges were agreed that among hundreds of thousands of pelts that were examined, in order to compile a list of the Master Trappers of America, five weasel pelts entered in the prize contest by A L Slipp, of Woodstock, New Brunswick, reigned supreme for that particular species of fur bearer.

J. F. CLARKE, - AGENT,

What Motorists Can Do.

A list of extraordinary accidents has recently been published concerning to motorists at level crossings and included the following:—One driver parked car on tracks and went to sleep. 44 motorists drove into the sides of moving trains. 38 drove into the sides of standing trains. One tried unsuccessfully to drive between the cars while they were switching. Seven went for a drive along the tracks and met express trains. One driver left his car on the tracks while he went to search for something he had dropped on the road; when he returned there was nothing left of his car. Eleven found out too late that their brakes needed relining.

Here and There

Successful Canadian exhibitors in the International Grain and Hay Show to be held at Chicago, November 29-December 6, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Bass Springs Hotel every evening. Under the ballroom windows they begin to shake their heads at a prance, cavort and caper while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific trans-Atlantic fleet, has been gazetted in the London Times of July 14 captain in the Royal Naval Reserve, promoted from the rank of commander, R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the R.N.R.

The province of Manitoba last month celebrated its sixtieth birthday. Where 60 years ago the buffalo reigned alone, Manitoba farmers are now pasturing 350,000 horses and 500,000 cattle as the prairie dweller instead of returning to fort or wigwam from his day's work, spends his evenings in his radio-equipped home or motors over good highways to the nearest city.

About a thousand tons of zinc concentrate from Field, B.C., on the main line of the Canadian Pacific Railway, were shipped to Japan recently, this being part of a movement of 1,500 tons monthly from a mine which started five months ago and which ships lead concentrate to California.

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway program of construction, maintenance and improvement from coast to coast of the Dominion. Program includes laying of branch lines, repairing and renovating of right of way, bridges, tunnels, stations, and other buildings. The men in general are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

CHAPTER XXVIII

As those two in the doorway moved out of the mirror's line of reflection, Grandma lifted compassionate eyes to Jimmy Bennett. She could not speak. Her throat felt parched. Anything she might say would seem inadequate; so it was in silence Jim arose and moved dazedly toward the door that led to the room beyond.

"I'll get out the back way," he managed to say huskily. "You tell her that George K. sent for me. Tell her anything you're a mind to—except the truth. I'll be all right after a minute. . . . Don't worry. . . . I'll . . ."

But he was too late. Charman was back, her eyes still shining as she glanced in bewilderment from Grandma's troubled countenance to the grim face of her old playmate.

"Where are you going?" she began, puzzled. "Come back, Jim. Sit down. I've got some news for you. What makes you act so queer?" Then light broke in upon her and she cried: "Oh, look here! Did—did you see that idiot kiss me?"

Her cheeks flamed, but Jim still stood in the doorway. He might have been a statue. He didn't speak; but Grandma answered shakily: "In—in the mirror, dearie. I didn't know you cared that way—either of you. I thought . . ."

"I see," said Charman. She laughed, and going close to Jim, looked at him: "And you thought, too, Jim? Really, I don't know that I blame you. It must have looked that way. That kiss—"

"You don't have to explain a kiss like that, Charman," Jim broke in gruffly. "It spoke for itself. I wish you happiness, of course; but now . . ."

"Uncle George is waiting for me, and . . ."

The girl drew an exasperated breath. "Let him wait," she responded. "You shan't go one step, Jim Bennett, till I've made you and Grandma understand this thing. Sit down."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude medicine when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

invitation here," said Grandma.

"You're welcome to invite yourself any time you want to. I've missed you like anything, Jimmy, and I presume Charman has, too, though maybe she's too bashful to let you think so."

"She means 'mildly,' Jim," laughed Charman, "and I fear I'm not even that. I've missed you abominably, and don't mind saying so to your face. But if you're to stay to supper you'll have to help to get it; and anyway, Grandma has talked enough for one while. You close your eyes, Grandma, and get a cat-nap while we rustle the repast."

The young man arose with alacrity, and Grandma said: "You get something good and hearty, Charman. Jim's hungry after his long journey. Maybe he'd relish one of your nice omelets with bacon. And you'd better mix up some biscuits while you're about it."

"You're nothing if not hospitable, Grandma," smiled the guest, "but I refuse to be treated as company."

He stooped to take the old lady's hand in a gentle grip that said, "All's well after all," before he followed Charman to the kitchen.

"This looks like an ark," he commented, glancing about appraisingly. "I suppose I've become accustomed to kitchenettes; and in these days when most of us don't keep a lot of help, I'll admit that they save space. Come here to the window, Charman. I want to look at you."

She smiled and answered: "Are you trying to detect gray hairs? It's a wonder I haven't got some, Jimmy." Her face clouded suddenly. "Did Uncle George tell you about . . ."

"About what?" he prodded as she hesitated.

Charman shivered. It had swept over her achingly that tomorrow she would be getting supper in a kitchen belonging to some strange man. She lifted her face, and Jim sensed the unshed tears behind her lashes.

"I've had to part with the old house, Jim. It was more than I could swing—alone. I sign the papers tomorrow morning to the bank. Don't tell Grandma tonight. She knows it's coming, but not when. It's silly to care so much for a house, isn't it? And yet—"

She turned abruptly away, did something unnecessary to the stove, and came back with a smile on her lips that twisted Jimmy's heart. "I—I'm sorry, Charman," he began, "but it's the—"

"Now don't you tell me it's sensible!" she cried, a sob in her voice. "Everybody tells me that—even Grandma. I know it's sensible, but—but . . ."

"I wasn't going to call it sensible," said Jim, "but I'm sure, even sure it is, when it hurts you. I was going to say that it's the way life usually treats us—lets us set our hearts on something, and then, when it seems as if we couldn't live without it, it takes it away. What's your buying the old place, Charman?"

"I don't know even that—some stranger who took a fancy to the house and asked at the bank if it could be bought. Uncle George arranged it. And we'll still have the law office, Jim. We'll live there and . . ."

She explained their plans while Jim, staring out of the window toward the orchard, listened thoughtfully.

"It was the dear old doctor's scheme," said Charman, "and once we get used to the change it will be all right. Now let's cheer up. It's hateful of me to thrust my burdens on you as soon as you arrive; and we must give Grandma a good time. She hasn't looked so happy for days and days, Jim. Forget my troubles now, and pare these apples. I'm going to make Dutch apple cake instead of biscuits because you like it. Wait till I tie this apron 'round you, please. That's a dandy suit, and you mustn't get it spotted the first thing."

Jim's familiar smile came back as she tied him in the blue apron. He said: "I'm glad the suit has made a hit. Mother thought I'd taken leave of my senses when she came across the bill in a coat pocket. I told her that considering the wealth she was squandering on a fruit ranch, she couldn't consistently complain of my extravagance! Then Aunt Sophie came in and took my side. Aunt Sophie's a peach. She's like my mother—well, with all the angles and papery. Do you catch my meaning? You'd love her, anyway. It was worth being exiled all this time to find an aunt like that, believe me."

W. N. U. 1853

ENOS "FRUIT SALT"

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy. ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

"Was that all you found in California?" queried Charman as she measured flour into a blue bowl. She was remembering the "girl" mentioned in Lizzie Baker's letter, but Jim answered in all seriousness: (To Be Continued.)

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Wool Warehouse Destroyed

Half a Million Dollar Loss Occasioned By Fire At Weston

Damage estimated at \$500,000, was caused by a fire which destroyed the building of the Canadian Co-operative Wool Growers, near Weston, Ont. Charred and crumpled walls containing 3,000,000 pounds of water-soaked wool were all that remained of the structure after firemen had finally conquered the blaze. Officials were at a loss to determine the cause of the fire.

Minard's Liniment is a household friend.

Most of the bugle calls used in the United States Army have been adopted from other countries.

About one-fifth of the highway mileage in the United States is surfaced.

Little Helps For This Week

"I will teach you the good and the right way."—1 Samuel xii. 23.

Live to do good; but not with thought to win From man return of any kindness done.

Do naught but good; for 'tuch the noble strife Of virtue is 'gainst wrong to venture love.

And for thy foe devote a brother's life. Content to wait the recompense above.

Brave for the truth, to thencest in suits meek. In mercy strong, in vengeance only weak.

—G. W. Bethune.

Use Minard's Liniment for Foot Ailments.

"Some people have no initiative," says a writer, "they merely follow the lead of those with brains." Led by the knowers.

ZAM-BUK HERBAL OINTMENT & MEDICINAL SOAP Complete treatment for Eczema, Ulcers, Erysipelas, Psoriasis, Scabies, Trichinosis, etc.

A Time for Loyalty.

Calgary Weekly Herald: There has never been a time in the history of the Wheat Pool when need for one hundred per cent loyalty from its members was more necessary than at the present moment. What the wheat situation will develop in the next month or two is something no man can prognosticate with any degree of certainty. The outlook is by no means reassuring. About the only thing certain is that every agency inimical to the success of the Pool will continue more and more active as the weeks pass. There will be all sorts of inducements offered to Pool members to "bootleg" their grain. No effort will be spared to damn the big co-operative movement in the eyes of its friends, and all sorts of specious argument will be advanced to induce members to desert the cause. It should not be difficult for Pool members to make up their minds as to what attitude they will take in such event. Their past experience with the Pool has been to their benefit as a class. One hundred per cent loyalty to the Pool is all that is needed to bring the great institution triumphantly thru the existing deplorable marketing situation. It ought to be able to count on this.

Teachers and Pupils

"Miss Amy Foerster has accepted a position as teacher in Camrose S. D., and left on Monday to take up her duties.

Gordon Botsford is teaching classes at Cromdale school in Edmonton.

While motoring out to his new school on Monday, Val Pailer had the misfortune to have his car break down, on the Baseline, necessitating the procuring of another car.

Walt Peters has accepted a position with an Onoway firm.

Concordia College opened its doors yesterday, and the usual number of students from this district were enrolled.

Walt Oppertshausen, who had been attending Concordia, is now a student at Alberta College North.

Mr Fred Ulmer, a graduate of Concordia College, left yesterday for the Lutheran seminary at St. Louis. On Sunday last a social evening was held, at his parent's residence, north of town; his young friends to quite a number being present. He is being accompanied on his journey by Sam Gautbert of Bruderheim.

The local High school has a record number of students this term, the accommodation being taxed to the utmost; there being 17 in grade 9; 14 in grade 10, and 13 in the 11th grade.

In the list of teachers and their locations, published in last week's Sun, a typographical error made it appear that one of our popular young students was appointed to Hollywood. This word should have been "Brookfield." You've all heard of Brookfield—the name Swift's sausage made famous.

Price of Fruits Up

Housewives who were, last week, painfully surprised at the sudden rise in the price of fruit, just at the height of the preserving season, were, no doubt, willing to blame the merchant and importer for this; but these latter are not the parties responsible. The upward trend in the price was owing to the action of the Federal government; such action being taken to prevent the dumping of certain fruits and vegetables from the U. S. The following is the values for duty of certain fruits and vegetables imported from the U. S.: Apples 6c per lb; cantaloupes 13c lb; cabbage 5c lb; celery 10c lb; onions 4c lb; peaches 12c lb; pears 9c lb; plums and prunes 8c lb; tomatoes 10c lb. The Order in council says this tariff will remain in force "until otherwise ordered."

Shooting in Game Reserves.

In answer to an inquirer, it can be stated that: Permits to hunt deer, moose or caribou in the forest reserves of the mountains north of the North Saskatchewan river during Sept. and October can be obtained by residents on payment of a fee of \$5 in addition to the regular big game license. Note that it is unlawful to act as a guide without a license.

Church Services.

Services in St. Philip's Church next Sunday, 11.30 a.m.

United Church service every Sunday Evg. at 7.30.

Mike Says:

The hum of conversation when a party of women get together usually means that someone is going to get stung.

A true friend is a man who knows you thoroughly, but likes you just the same.

The Lucky Editor.

Through the kindness of friends who are lucky at the fishing business, the editor's family has been living on fish as a staple diet for a couple of weeks. All his kids are growing fatter and making noises like a trout—Vegreville Observer.

Mecklenburg, Optician.

Reasons why you should consult me about your eyes.

- 1—I am qualified, graduated, holder of 4 diplomas
- 2—I have had 40 years experience
- 3—I have practiced in the west for 27 years.
- 4—I have practiced in Montreal, New York and New Haven.
- 5—I charge you for Skill, Experience and Knowledge, and not for glasses.
- 6—I give you the very latest and best quality in frames lens and artificial eyes.
- 7—My charges are lower, for I pay no commissions, nor do I split fees.
- 8—I pay no exorbitant rent for stores down stairs. I am up one floor.
- 9—I visit your town regularly.
- 10—I give polite, courteous and considerate attention.
- 11—I save you 25 per cent on all optical work.
